Book reviews
Perfumery Technology. Art: Science: Industry. V.F. Wells and M. Billot, 111
Correspondence; 261
Cosmetics; Women's use of cosmetics: psychosocial correlates and consequences, 1
Detergents; An investigation of detergent action on cells *in vitro* and possible correlation with *in vivo* data, 179
Emulsions; Emulsification of vegetable oils: using olive oil, 83
Emulsion stability
Influence of homogenisation on emulsion stability, 207
The influence of the stability of creams prepared with polyethylene glycol 1000 monostearate/fatty alcohols, 133
Eye irritation; An *in vitro* test for the assessment of eye irritancy in consumer products – preliminary findings, 223
Fatty alcohols; The influence of fatty alcohols on the structure and stability of creams prepared with polyethylene glycol 1000 monostearate/fatty alcohols, 133
Gums; Safety evaluation of gums and thickeners used in cosmetic formulations, 53
Hair
Evolution in the composition of human skin surface lipids during their accumulation on scalp and hair, 39
Henna. Sorption of lawsone by hair, 153
Homogenization; Influence of homogenization on emulsion stability, 207
***In vitro* testing**
An investigation of detergent action on cells *in vitro* and possible correlation with *in vivo* data, 179
An *in vitro* test for the assessment of eye irritancy in consumer products – preliminary findings, 223
Lanolin; alcohols of lanolin. Evaluation of the sensitizing potential on guinea-pig with six samples of, 99
Medal Lecture 1982, 219
Methodology
The effect of various constituents of the *stratum corneum* on the measurements of its elasticity, 247
Identification and dosage of *N*-propoxylated ethyl paraaminobenzoates in suncreams. TLC, GLC, RMN, HPLC, 235
A method for evaluating the photoprotective action of sunscreens against UV-A radiation, 15
Quantification of the skin's topography by skin profilometry, 195
Predictive nature of, laboratory methods in sunscreen studies, 115
Mutagenicity; Mutagenicity of aminonitrophenol compounds in *Salmonella typhimurium*: a study of structural-activity relationships, 25
NMR (Nuclear Magnetic Resonance Spectrosopy); Sunscreens derived from paraaminobenzoic acid. Identification and dosage of *N*-propoxylated ethyl paraaminobenzoates in suncreams, 235
Psychosocial correlates; Women's use of cosmetics: psychosocial correlates and consequences, 1
Physiology; Physiological background to skin ageing, 103
Publication Prize
Publication Prize 1979, 220
Publication Prize 1980, 221
Safety
Safety evaluation of gums and thickeners used in cosmetic formulations, 53
Safety evaluation of some humectants and moisturisers used in cosmetic formulations, 67
Sensitivity; sensitization potential on the guinea-pig of different samples of alcohols of lanolin. Evaluation of, 99
Skin
skin ageing. Physiological background to, 103
Evolution in the composition of human skin surface lipids during their accumulation on scalp and hair, 39
skin profilometry; Quantification of the skin's topography by skin profilometry, 195
Stratum corneum
The effect of various constituents of the corneous layer on measurements of its elasticity, 247
Structural activity relationships
Mutagenicity of aminonitrophenol compounds in *Salmonella Typimurium*: a study of structural-activity relationships, 25
Sunscreens
Sunscreens against UV-A radiation. A method for evaluating the photoprotective action of, 15

Sunscreen derived from paraaminobenzoic acid. Identification and dosage of *N*-propoxylated ethyl paraaminobenzoates in sun-creams, 235
sunscreen studies. Predictive nature of laboratory methods in, 115
UV-A radition
A method for evaluting the photoprotective action of sunscreens against UV-A radition, 15
Vegetable oils
Effects of avocado and soya bean lipidic non-saponifiables on the components of skin connective tissue after topical application in the hairless rat: biophysical and biomechanical determination, 143
using olive oil. Emulsification of vegetable oils, 83
